I am a self-motivated designer who constantly questions the norms in architectural practice. Through research, exploration, a holistic view on architecture and a background with acoustics, lighting design, technology and landscape I am able to synthesize designs that meet a plethora of constraints. Combine this with an ability to communicate graphically and I know that I can have a positive impact on any firm I enter.

EXPERIENCE

Dreyfuss + Blackford

August 2022 - Present

Project Architect

- Responsible for creative and technical aspects of the delivery of architectural projects including planning, development of designs, presentation materials, construction documents and construction administration services.

Notable Projects
